

# Project Development - Database design

## E-R Diagram Design:

Link : <https://www.datanamic.com/dezign/erdiagramtool.html>

E-R Diagram E represents the Entity and R represents the relationship between them.

Entity : Table (collection of data in the form of Rows and Columns)

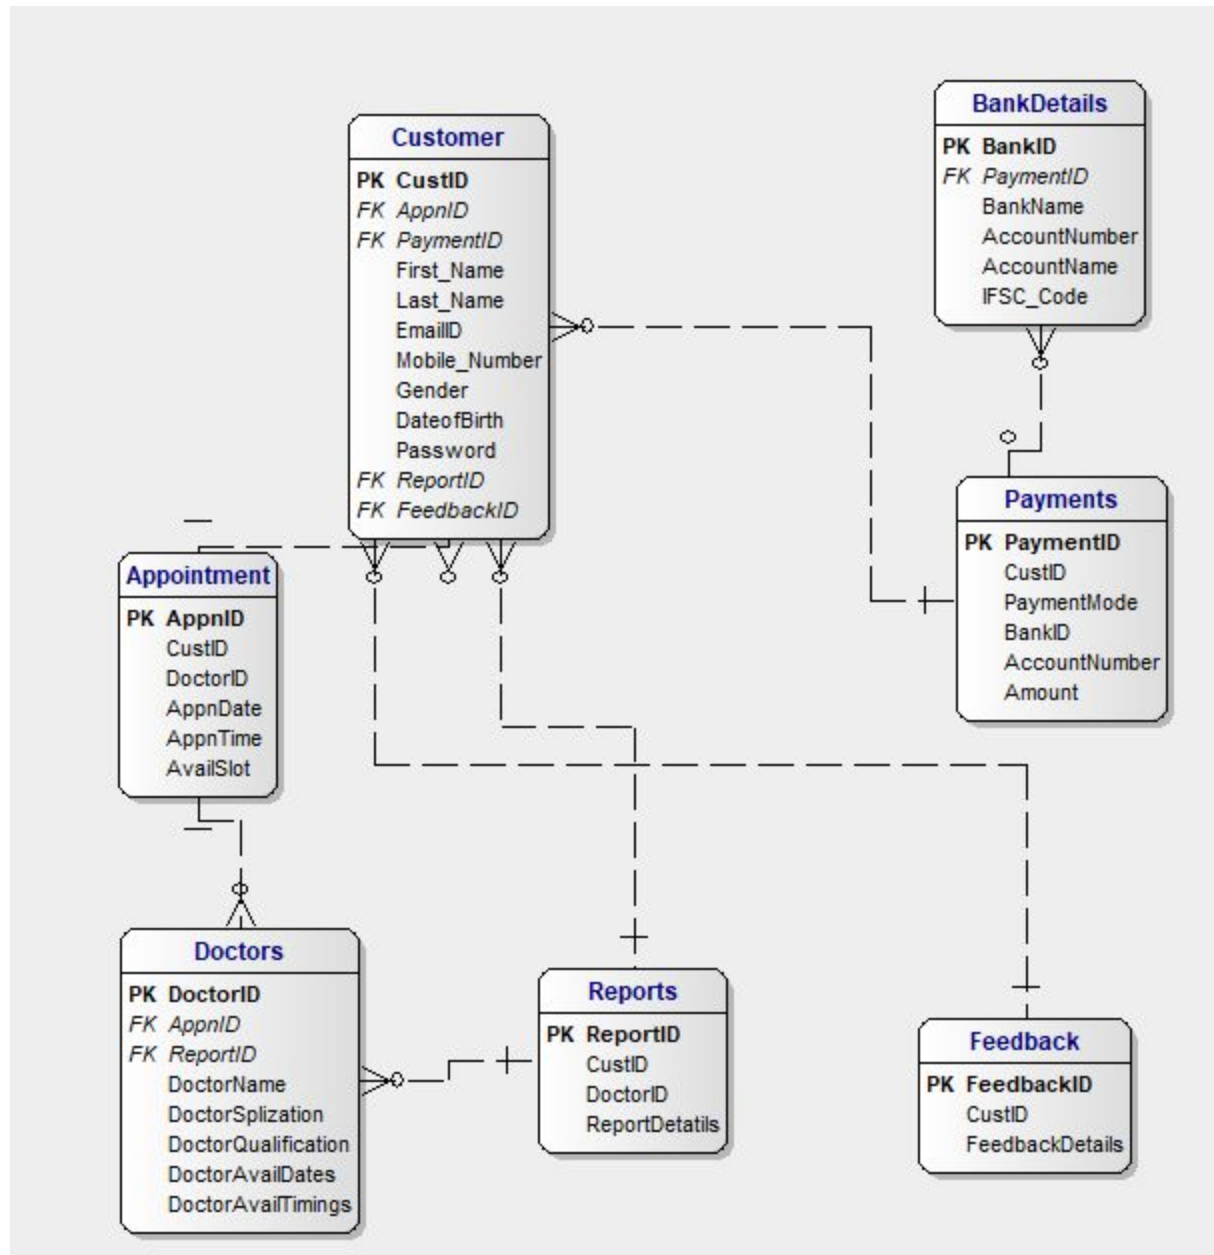

Columns can be called Attributes and rows can be called as Tuples

CustId	CustName	CustMobile	CustEmailID	CustAddress
1	Anil	9988776665	<a href="mailto:anil@dhyanahita.org">anil@dhyanahita.org</a>	Hyderabad

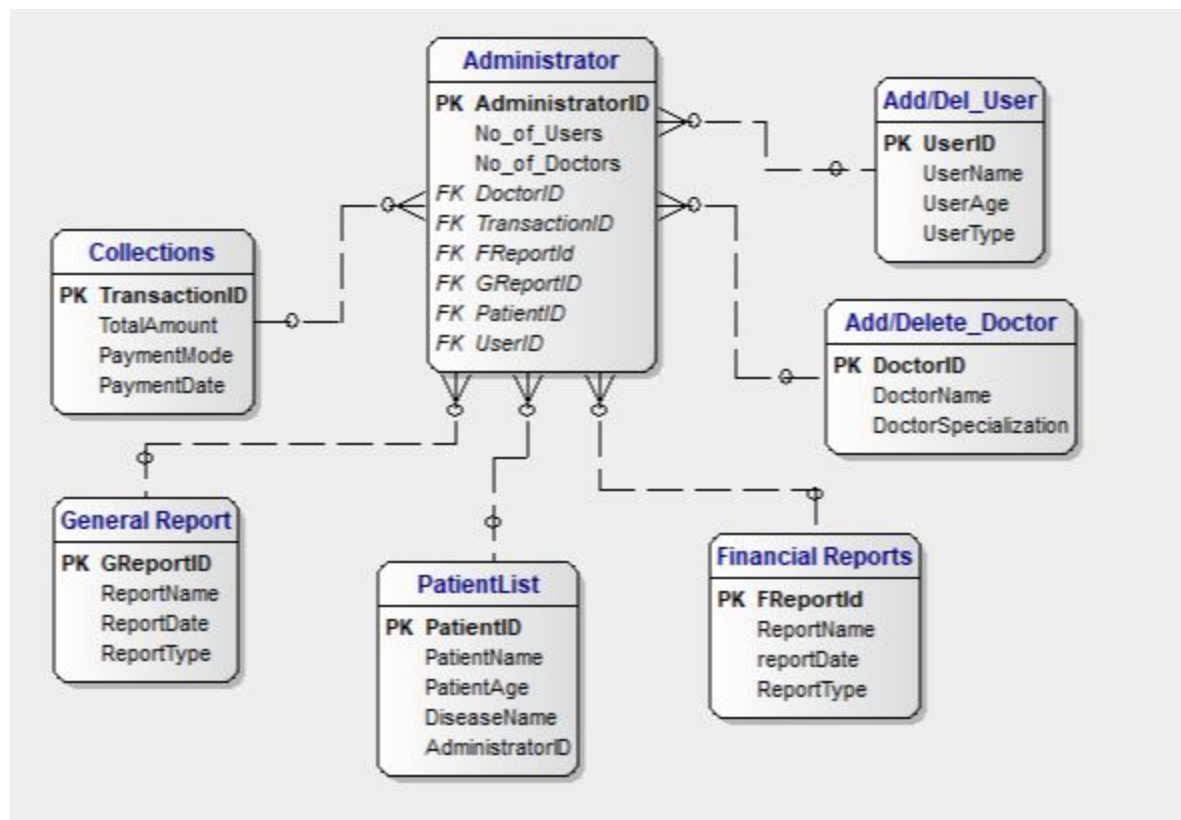

Tuple or Row

Columns or Attributes

E- R Diagram for User Module

E- R for Administrator Module:

E-R for Doctor Module:
